

ROOM PLAN

Layout your kitchen

First decide the layout of the kitchen you want. Next use the scale cutouts below and try different layouts on your room plan above. Check with your local council regarding local bylaws and legal requirements.

Do...

- Put hobs against outside walls if possible to allow easy venting to outside.
- Allow at least 300mm clear benchtop each side of a hob.
- Check that sink and waste disposal will fit into base cabinet.
- Include at least one set of drawers.
- Mark whether doors open left or right on single door cabinets.

Don't...

- Place stoves or hobs in front of windows.
- Put wall units over a hob unless an extractor is installed.
- Put hob too close to the sink, ideally no closer than 600mm.

Order

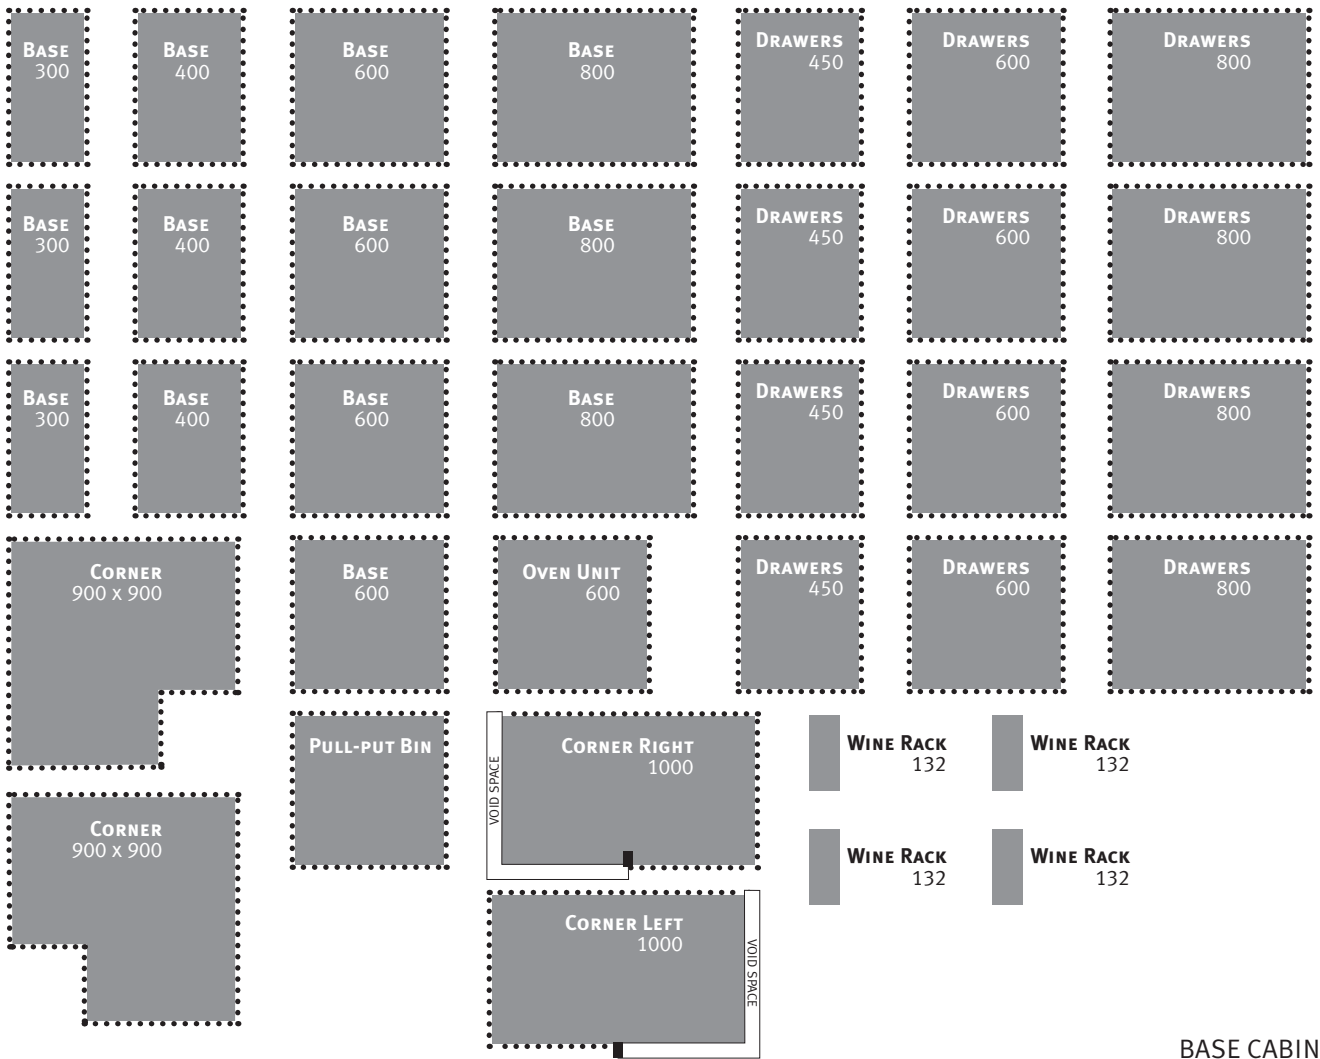

You are now ready to create a list of all the components you need from our assembled or kitset unit lists.
